-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. Applicant's election with traverse of Group I in the reply filed on 21 March 2006 is acknowledged. The traversal is on the ground(s) that the method includes the use of the structure of the claimed method. This is not found persuasive because the method claim 17 recites the structure of the apparatus in the preamble of claim 17 while the body of the claim reciting the method steps does not include any specific structure, therefore; claim 17 only defines that the method is intended to be used with the apparatus recited in the preamble, but not limited to that particular apparatus.

The requirement is still deemed proper and is therefore made FINAL.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 through 6, 10 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Maekawa et al.

Note the control arrangement of Maekawa et al act as the output selector which in Maekawa et al automatically selections the media receiver and moves the selected media receiver into position to receive the discharged media.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3653

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Maekawa et al in view of Kitahara.

Maekawa et al as interpreted above in paragraph 3 teaches everything except the arrangement of cables and pulleys to move the media receivers.

Kitahara teaches that a motor 11 through an arrangement of cables 15 and pulleys 12,13 may move such movable media receivers.

It would have been obvious to one of ordinary skill in the art to employ an arrangement of cables and pulleys to move the media receivers of Maekawa et al in view of the teaching by Kitahara that such arrangement is known to be employed to move an array of media receivers.

7. Claims 8, 9 and 12 through 16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
